Report

No.: 1706-W-52061
Date of arrival: 16-06-2017
Date of report: 22-06-2017

Patient identification:	Dog	Male	* 27.04.16
	Toy Pudel		
Owner / Animal-ID:	Petersen, Pia		
Type of sample:	Swab / EDTA-Blood		
Date sample was taken:	13-06-2017		

Name: **Sugarpine's Tomorrow And For Ever**
Stud book no.: **DK07656/2016**
Chip no.: **208250000076660**
Tattoo no.: **---**

*prcd-PRA (partner lab) - PCR

Result: Genotype N/N (A)

Interpretation: The examined animal is homozygous for the wildtype-allele. It does not carry the causative mutation for prcd-PRA in the PRCD-gene.

Trait of inheritance: autosomal-recessive

Scientific studies found correlation between the mutation and symptoms of the disease in the following breeds: Australian cattle dog, American Cocker Spaniel, American Eskimo Dog, Australian Shepherd, Australian Stumpy Tail Cattle Dog, Bolognese, Bolonka Zwetna, Chesapeake Bay Retriever, Chihuahua, Chinese Crested, English Cocker Spaniel, English Shepherd, Entlebucher Mountain Dog, Finnish Lapphund, German Spitz, Giant Schnauzer, Golden Retriever, Karelian Beardog, Kuvasz, Lagotto Romagnolo, Lapponian Herder, Labrador Retriever, Markiesje, Norwegian Elkhound, Nova Scotia Duck tolling Retriever, Portugese Water Dog, Poodle, Schipperke, Swedish Lapphund, Silky Terrier, Spanish Water Dog, Swedish Lapphund,

sample ID: 1706-W-52061

Wäller, Yorkshire Terrier.

Sampling:

The sample of the animal was taken by the following official sampler (vet, breed warden etc.):

Johanne Anker

The current result is only valid for the sample submitted to our laboratory. The sender is responsible for the correct information regarding the sample material. The laboratory can not be made liable. Furthermore, any obligation for compensation is limited to the value of the tests performed.

There is a possibility that other mutations may have caused the disease/phenotype. The analysis was performed according to the latest knowledge and technology.

The laboratory is accredited for the performed tests according to DIN EN ISO/IEC 17025:2005. (except partner lab tests).

*: test performed by partnerlaboratory

***** Diagnostic Update Strangles *****

In addition to our PCR panel (simultaneous detection of Strep. equi equi and Strep. equi zooepidemicus, test no. 8171), we now offer a single PCR detection of Streptococcus equi equi (test no. 8556).
Sample material: nasal swab without medium, lavage (guttural pouch), tissue (e.g. lymph node).
